Dear Bob:

We have heard that the schedule for various activities covered by the IAG may be under discussion.

I wanted to ask your help in seeing that the schedule for the OU-3 work not be stretched out. The future operation of Great Western Reservoir depends heavily on the results of the RIFS and the determination of whether, and what, remedial action will be taken.

As you know, we plan to stop using Great Western in January of 1995. The current IAG schedule requires the RIFS to be done well before that date, so that we should at least have a handle on what, if anything, will be done at the time we stop using the GWR system.

Again, we would appreciate anything you can do to keep the OU-3 RIFS process on schedule.

Thanks for all of your help.

Sincerely,

George Di Ciero
City Manager
